SUMMARY

Android App Development using Generative AI Intern with early-career experience in AI-assisted mobile solutions. Delivered the Raksha Kavach safety monitoring app, designing multiple worker-safety modules and integrating Room Database for incident logging. Skilled in Python, Java, SQL, Android Studio, and generative AI workflows to streamline development and data handling. Aiming to leverage AI-enabled application development and data analytics expertise to drive innovative solutions.

EDUCATION

CAMBRIDGE INST. OF TECHNOLOGY NORTH CAMPUS

Bachelor of Engineering, Computer Science (GPA: 8.73)

Nov 2022 - May 2026

Bengaluru, KA

TECHNICAL SKILLS

- **Languages:** Python, Java, SQL, JavaScript
- **AI-Assisted Development & Analytics:** Generative AI Concepts, Data Analysis, UI/UX Design
- **Web & App Development:** Android Studio, HTML, CSS, React, REST APIs
- **Databases & Tools:** MySQL, Room Database, Git, GitHub, Power BI, Tableau, Excel, VS Code
- **Core CS:** DBMS, Operating Systems, Computer Networks, Object-Oriented Programming

EXPERIENCE

MindMatrix | *Android App Development using Generative AI Intern* Feb 2026 - May 2026

- Developed the AI-assisted Android safety monitoring app, Raksha Kavach, using Android Studio, Python-based AI models, and REST APIs, enabling real-time hazard detection for workers
- Built task-based workflows using Android Studio and AI-assisted development practices.
- Designed 4+ worker safety modules for industrial scenarios.
- Integrated Room Database for incident logging and safety reporting.

PROJECTS

MEDALERT – AI-Based Patient Condition Live Tracking | [GitHub](#)

- Built a real-time AI-powered patient monitoring system for continuous activity tracking using live camera feeds.
- Implemented automated emergency email alerts for abnormal patient activity detection.
- Designed multi-patient tracking and automated monitoring workflows for real-time observation.

Raksha Kavach – AI-Powered Industrial Safety Monitoring App | [GitHub](#)

- Developed an AI-powered Android safety monitoring app using Jetpack Compose and Material 3.
- Implemented dynamic risk analysis, PPE checklist tracking, incident reporting, and Room Database integration.
- Integrated Gemini AI for safety recommendations and incident analysis with responsive multi-screen navigation.

CERTIFICATIONS & ACHIEVEMENTS

- Data Analytics Job Simulation: [Deloitte](#)
- Solutions Architecture Job Simulation: [AWS](#)
- Ultimate Job Ready AI-Powered Data Analytics Course: [CodeWithHarry](#)
- Python for Data Science: [Infosys Springboard](#)
- Cisco Content Networking: [Cisco](#)
- UI/UX Design with Figma: [Internshala](#)
